INSTALLATION

Select a suitable location to drill two holes on the finished wall according to the rough-in dimensions and diameter of the anchor(1), their distance is 712mm. Press the anchors into the holes.

Apply a ring of plumbers putty or sealant into the groove on the backside of the slide bar trim. Position the trim and post(3) over the mounting hole. Secure the trim and post to the wall with a screw(4). Loosely tighten the screw.

Hold the slide bar up against the posts. Adjust the position of the posts until the slide bar fits snug against the curved cutout of the posts. Remove the slide bar and tighten the screws to secure the posts.

Thread the pin(5) into the post, tighten with a flat blade screwdriver.

Line up the hole of each lock assembly(6) with the holes of the slide bar. If needed, use a screwdriver to adjust the position of the lock assemblies.

Align the pins with the holes in the slide bar and slide bar locks. Insert the pins through the slide bar and lock assemblies.

Secure the slide bar by tightening the setscrews(7) into the lock assemblies. Press the cap(8) into each end of the slide bar.

INSTALLATION CHECKOUT

Ensure that all coupling nuts are tightened.

The height of handshower holder can be adjusted by pressing the pinch cock and sliding up and down.

CLEANING INSTRUCTIONS

All Finishes: Clean the finish with mild soap and warm water. Wipe entire surface completely dry with clean soft cloth. Many cleaners may contain chemicals, such as ammonia, chlorine, toilet cleaner etc, which could adversely affect the finish and are not recommended for cleaning.

Do not use abrasive cleaners or solvents on Kohler faucets and fittings.
